

Copyright and Conditions of Use

PRISM is a not-for-profit web portal sponsored primarily through the generous support of the Lilly Endowment, Inc. Part of our mission is to facilitate the sharing of ideas and expertise among Indiana teachers. To that end, we are offering a Learning Unit Tool that helps teachers develop lesson plans that integrate PRISM's digital resources into the traditional STEM curricula. These lessons may then be submitted to the PRISM database so that other teachers may use them or adapt them for their specific situation.

The Learning Units Library helps teachers create and share. Contributing to the Library constitutes agreement to the following terms of use.

1. Registered PRISM members may access and use each lesson plan – either in its entirety or adapt the various components of the unit.
2. Copyright for original materials resides with the contributing author(s). However, submission to the PRISM database constitutes permission for other registered PRISM members to make fair use of the resources for non-commercial purposes only.
3. Appropriate attribution must be given when using the materials outside of a classroom environment. That is, if the materials are used for in-service purposes, the original author(s) should be credited for their work.
4. Materials may not be sold or distributed commercially without the written permission of the contributor.
5. Contributors may request that their learning units be removed by contacting the PRISM webmaster.

For uses not covered in the above, please contact the PRISM webmaster, Ryan Smith, at smithrn@rose-hulman.edu
